Personal Statement

As Anudari Oyunbat, a graduate of the University of Finance and Economics, I embarked on a transformative journey, transitioning from the realms of accounting to the dynamic landscape of full-stack development. As both a student and intern at Pinecone Academy, I am dedicated to honing my skills and contributing to groundbreaking projects that push the boundaries of innovation.

My career shift signifies more than just a change in job title; it represents a profound commitment to personal growth and professional evolution. Embracing this transition, I am poised to leverage my background in finance and economics to bring a unique perspective to the field of software engineering. I am ready to contribute to ground-breaking projects and embrace new challenges head-on.

Hobby

In my leisure time, I pursue a variety of interests including hiking, dancing, biking, watching movies, cooking, and drawing. These activities not only provide relaxation but also serve as outlets for creativity and personal expression.

Education

Pinecone Academy   2023 - 2024

University of Finance and Economic

2017 – 2021   GPA – 3,2

Work experience

Pinecone – intern   2023– 2024

Great vision - accounting   2021–2022

Skills

Hard Skills:

1. Frontend Technologies:
- React Hook Form, Apollo client-GraphQL, MUI, Formik, Styled-components, Embla Carousel, Tailwind CSS, DaisyUi
2. Programming Language:
- JavaScript/TypeScript
3. Backend Technologies:
- Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Passport.js
4. Other Tools & Libraries:
- Axios, Nodemailer, SweetAlert2, Yup, Zod
5. Development Tools:
- Git, ESLint, TypeScript, PostCSS, Tailwind CSS, Git hooks/Husky/, CI, CD, Apollo Server for GraphQL server, Nx for monorepo management
6. Testing:
- Cypress, Jest

Soft Skills:

- Fast, Responsive, Intuitive, Dynamic, Eager Learn, Passionate

Projects

Pinecone – HRMS – recruiting project/team-project lead/

- Learning new stacks and tools – GraphQL, Monorepo, Jest, Cypress
- Using DaisyUi will make much better to starting out servers
- Writing unit tests on Jest and.,
- Using Cypress end-to-end testing framework specifically designed for modern web applications. It provides an all-in-one solution for writing, running, and debugging tests, with a focus on simplicity and this test is help our code quality.
- Nx Monorepo management to facilitate seamless collaboration and onboarding within a single project, accommodating multiple contributors.
- Using GraphQL-Apollo server make our project benefits from efficient data fetching, type safety, centralized data management, rapid iteration, and enhanced developer experience.

Central cinema – Full stack web/Team project lead/

Backend-app

- Developed a comprehensive backend system for a cinema application using Node.js and Express.js.
- Integrated MongoDB with Mongoose for efficient data storage and management.
- Created various utility scripts for database management, including uploading, deleting, changing movies data also upcoming events.

Frontend-app

- Implemented complex UI components and interactions using Radix UI, React Feather icons, and other libraries.
- Utilized Formik and React Hook Form for form handling and validation.
- Ensured responsiveness and accessibility of the application using Tailwind CSS and accessibility-focused libraries.
